Typ (E, C, N)¹: N

Reference Number: 35

Billing Module

Short Description: Create a possible Billing module

Full Description:

There must be created a new billing module. The basic programming ideas can be putted out of the italian version.

Following requirements must be fulfilled:

- Summary of all costs
 - o Services
 - o Pharmacy
 - o Laboratory
- Discount option

The account officer can see each position of the patient. Care2x calculating the ammount of each position. The account officer gets also the possibility to delete one or more positions out of the bill. He can also give an account to the patients bill from the total ammount.

After pressing (OK), a pdf will be created out of the position the account officer accepted. This can be printed for the patiend as a receipt and will also be stored into the filesystem of the server. Each final bill cannot be changed or deleted after creaton of the pdf.

Implementation Remarks:

For a later tracking, all positions the account manager deleted out and the given discount will be stored into the database. Also the data of the final bill will be stored for the reporting module.

Will be realized by: MEROTECH

Estimated Realisation: 4 days

Needed till: 1st of March

¹ C=Change; E=Error; N=New

Date: Freitag, 7. Januar 2005
