

Project: ELCT :: Care2x

Typ (E, C, N)¹: N

Refernce Number: 9

Words of simiar effects

Short Description: The user acceptance must be high. That means that the input boxes should calculate the percentage of the error of mistiping automatically.

Full Description: Is there a misspelled word, the form should be reloaded and the text box should be replaced to a select box with an selection of similar words.

Implementation Remarks:

Prepare a Method in the object model that gives a selection of similar words back. This method should be called by a referring table of the database and the search pattern. Your friend will be the php function „similar_text(...)“.

Will be realized by: MEROTECH

Estimated Realisation: 2 days

Needed till: 1st of February

¹ C=Change; E=Error; N=New

Date: Freitag, 7. Januar 2005
