**Type (E, C, N)<sup>1</sup>: C**

**Reference Number: 29**

## OP Room

### Short Description:

Following points are important for the work in Selian

- no selection of department, they have only the ,general surgery'
- The given sheet must be customized
- There must be a list for the surgery to see the pending operations of the next week.

### Full Description:

On the Process start (OP-Room) there will be only „OP Room Documentation“ used. Comment the other points out (Or redirect directly to the next document).

To select a department it will not used. Please make a standard to ,General Surgery' and redirect directly to the next document.

Following points are important for the surgery:

- it is important to see the diagnostics of the patient
  - o There can be more than one diagnostic of each patient
- There can be operating MD's for one day, these MD's are not listened at the selian doctor's list

Following points must be changed:

Old description	New description
Therapy	Procedure
Classification text elements	The classification will be changed to radio boxes. The drop down lists are not used there
Special Notes	Special Remarks
Localization	Location

Following fields must be created:

- Complications

### Implementation Remarks:

<sup>1</sup> C=Change; E=Error; N=New
